June 10, 2023

Dear Readers

ALLAH THE ALMIGHTY, the creator of the universe, always bestowed humanity with knowledge and wisdom to search for secrets. We earnestly bow our heads before His Compassionate Endowment.

MDPIP committed to the publication of quality research work. It strictly adheres the policies of Management Board and Editorial Board respectively. With the help of our dedicated technical team, we proudly share with our audience that now MDPIP journals are indexed in the leading academic bodies i.e., ISSN International France, Crossref, Doi, Escience Press, Dora, Google Scholar, Orcid, and Publons Clarivate Analytics, while indexing with Ebsco and ICMJE is in process. We are positive that by the end of January 2024, MDPIP journals will be indexed with Higher Education Commission of Pakistan, Web of Science, and Scopus.

MDPIP in its journey as a publisher presents the second issue of its Open Access Public Health and Health Administration Review with five quantitative articles covering various aspects of public health and health services management. The findings, interpretations, and conclusions expressed in these articles are entirely those of the researchers, thus, naturally MDPIP nor does its Editorial Board bear responsibility for any liability for the findings and results. The publication of the issue in hand was not possible without the sincere cooperation of the members of Editorial Board and Review Panel who spared and generously devoted their time and efforts who thoughtfully reviewed the assigned research work. MDPIP must express sincerest appreciation and gratitude to them all.
